## 1976 CENSUS

### USER SUMMARY TAPE AND MICROFICHE

#### TABLE CONTENT

**PRELIMINARY / PRÉLIMINAIRE**

November 1977

PRELIMINARY / PRÉLIMINAIRE

The following document describes the content of the pre-planned data available on User Summary Tape files and Microfiches produced from the 1976 Census Micro Data Base.

A series of related tables pertaining to demographic, housing, household, family and economic characteristics are available on correspondingly named files (see Appendix A). The content specifications of these files may vary slightly from the final version of data actually available possibly due to unforeseen problems at the time of production and/or of quality assurance. Detailed breakdown of each characteristic variable available in terms of its class intervals is outlined in Appendix B.

Tabulations are available on both magnetic tape and microfiche media.

The media on which each tabulation is available is noted in Appendix A. Each tabulation on microfiche is either bilingual (B) or available separately in english or french (E/F) languages.

Documentation describing contents of summary tape files is also available in both official languages.

The tables will be produced at the enumeration area (EA), census tract (CT) and census subdivision (SD) levels (see appendix C). Most tables will be further aggregated to include totals for Canada, regions, provinces, census divisions and federal electoral districts where applicable. The spatial identification on each record gives all the higher level codes associated with a given geographic level.

It is estimated that files will be produced starting in December 1977 and released as they become available. Production will be split into tabulations based upon 100% data (2A) followed by the 33 1/3% sample (2B) data.
